Re; P.O. U-77029

Dear Mr. Carpenter :

Please review the following replies to your initial review of the above noted Plan.

1. With regard to the travel trailers which are presently on site, we do plan to remove all but one. As noted in the plan, there will be a small trailer that will remain on site for use as an office for telephone work, etc. All others will be removed. We are in the process of getting a certificate from the Bear River Health Dept. for temporary work camp at our Clarks Basin operation. The remaining trailers will be moved to this area when the certificate is issued.
2. At the time of final reclamation it is planned that all remaining waste rock will be buried on site. We would like approval for at least 50 tons to be present at any one time prior to final reclamation. We will be using a portion of the existing waste rock as a gravel surface for the truck turn around area, and some of the Inventory area. At the time of final reclamation, topsoil will be redistributed Over this area, and then it will be re-seeded.

Thank you for your consideration of this reply. We will await further notification regarding this case.

Sincerely,

*William L Bown*  
William L Bown
